

General Overhaul:

More than 20 years of service ...

... make even a P&L ...

... look old.

But only cleaning, ...

... a little bit cosmetics ...

... and some colour ...

... are not sufficient ...

... in our opinion!

Only a complete ...

... disassembly of the machine ...

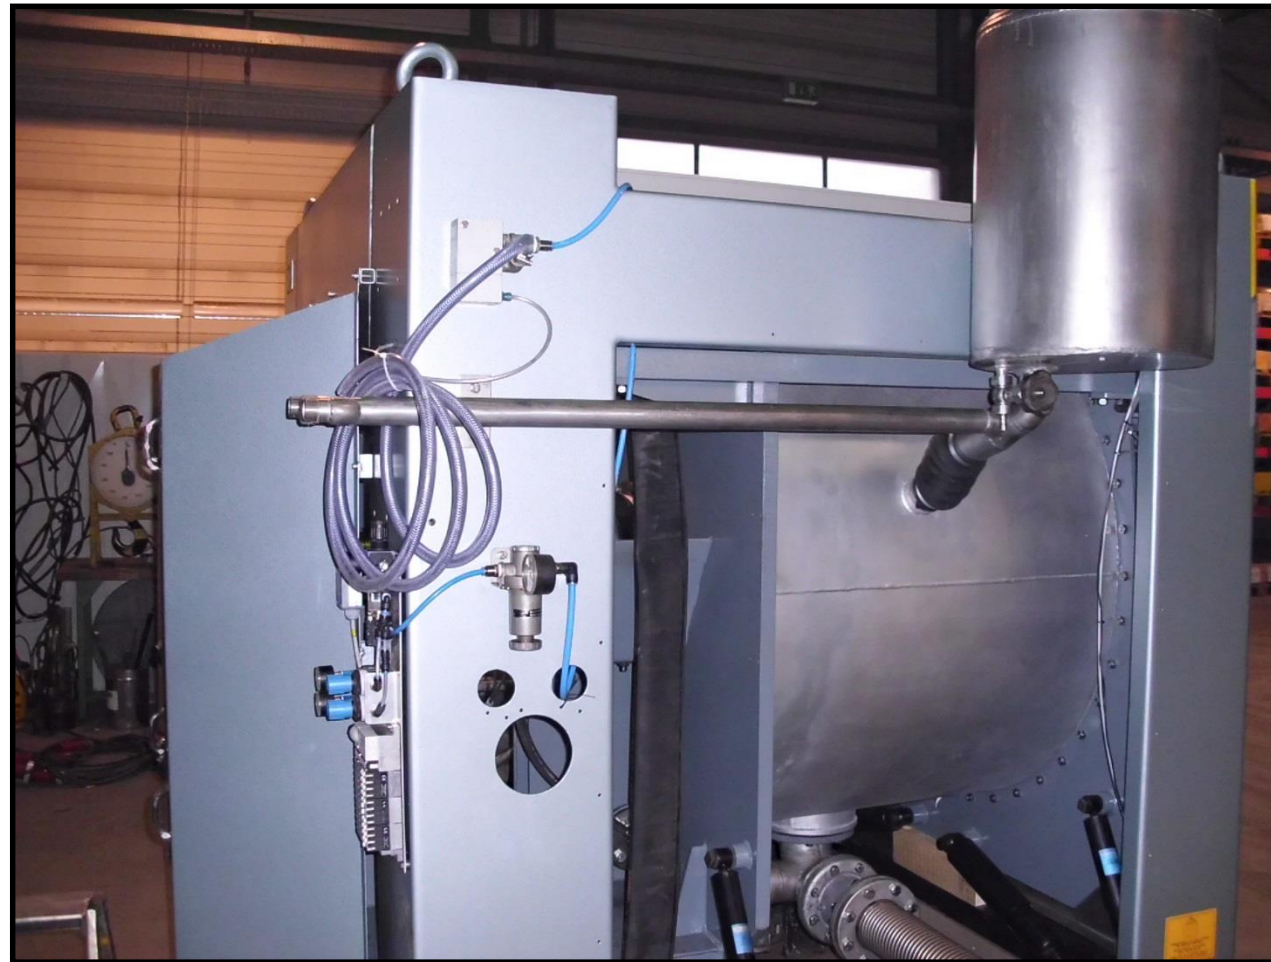

... results in a completely overhauled ...

... machine as good as new.

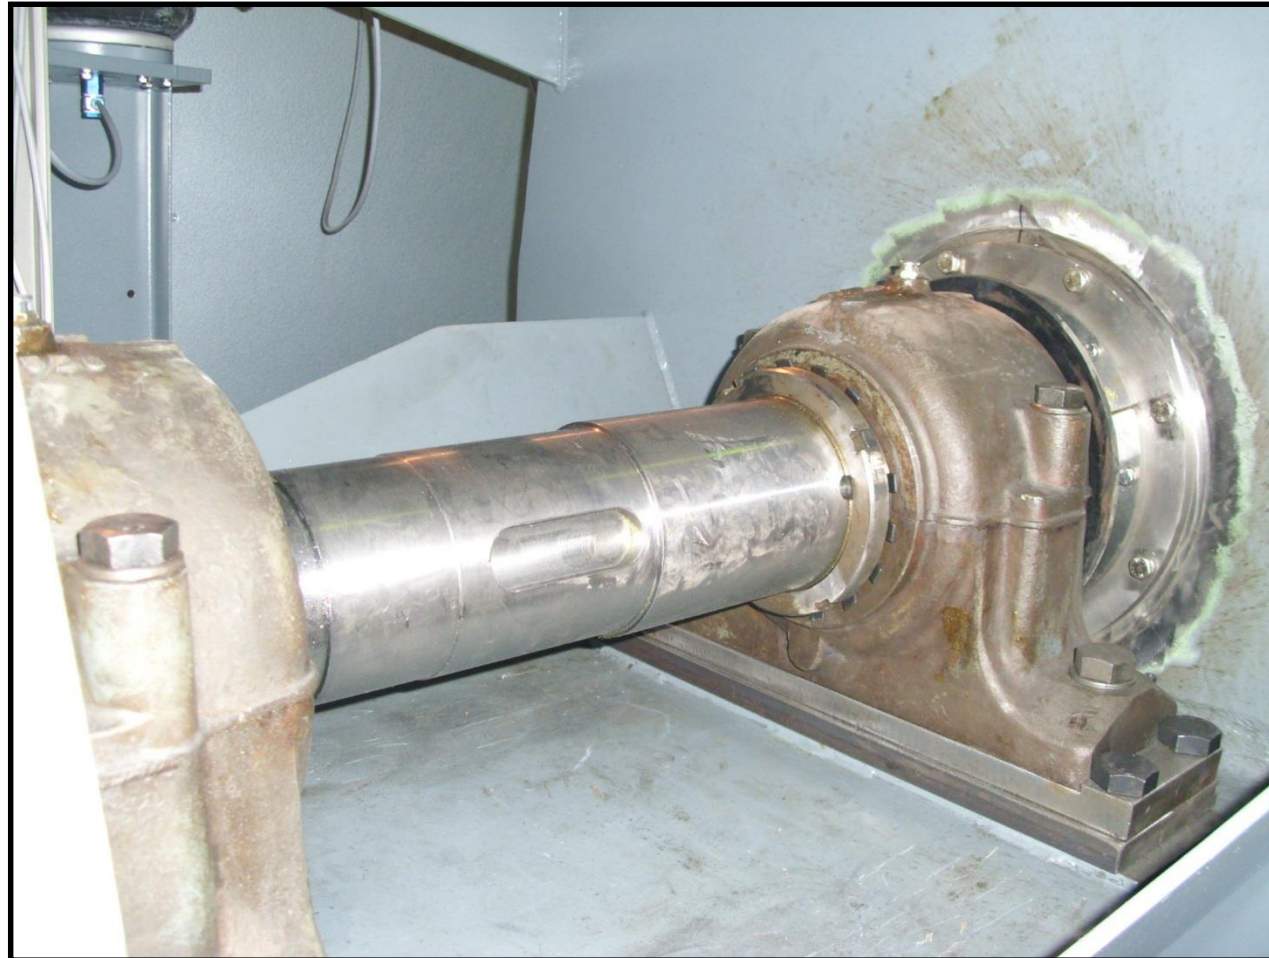

Check-up of the heating device

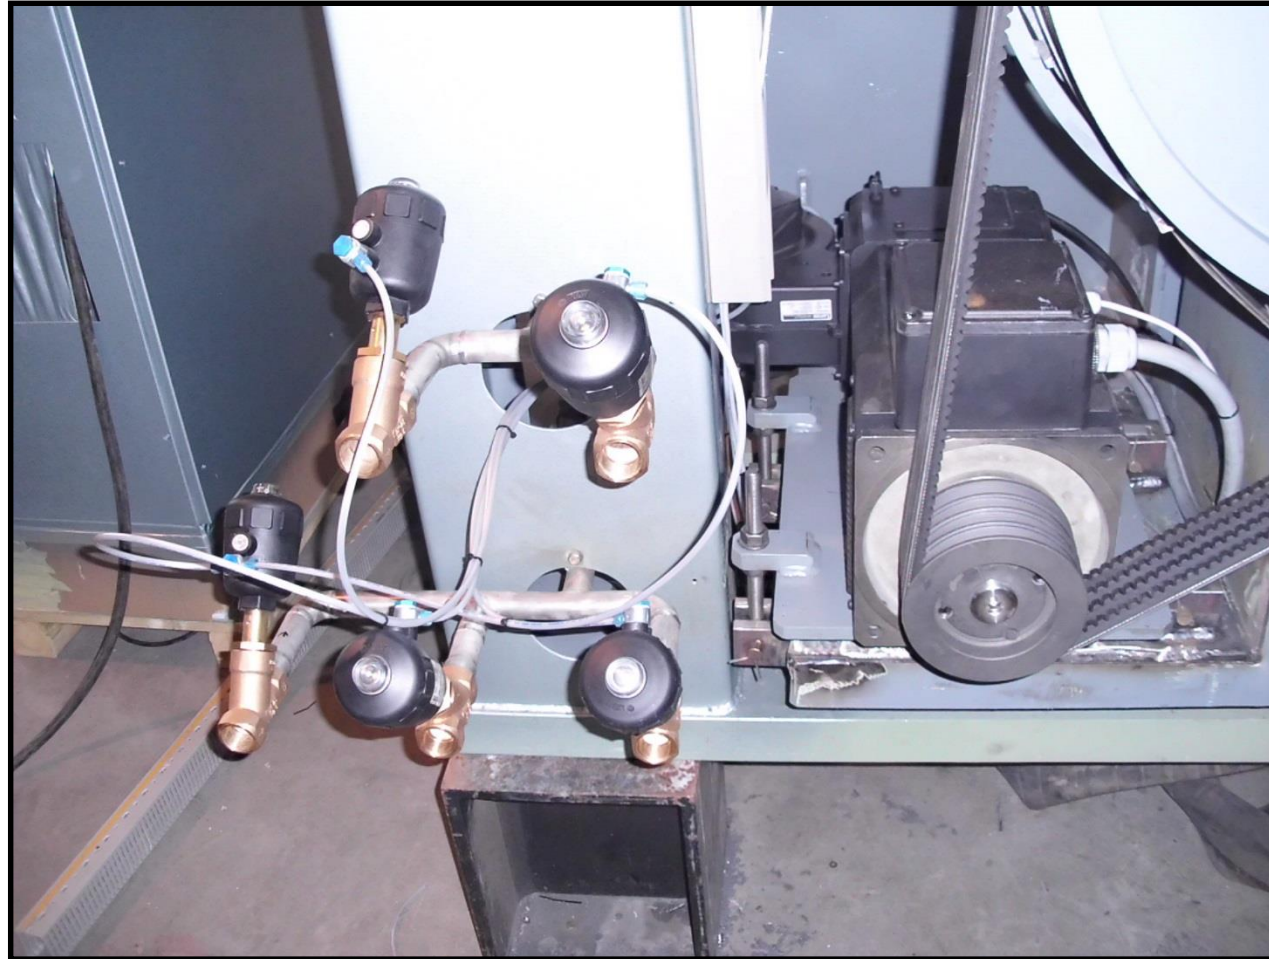

New bearing

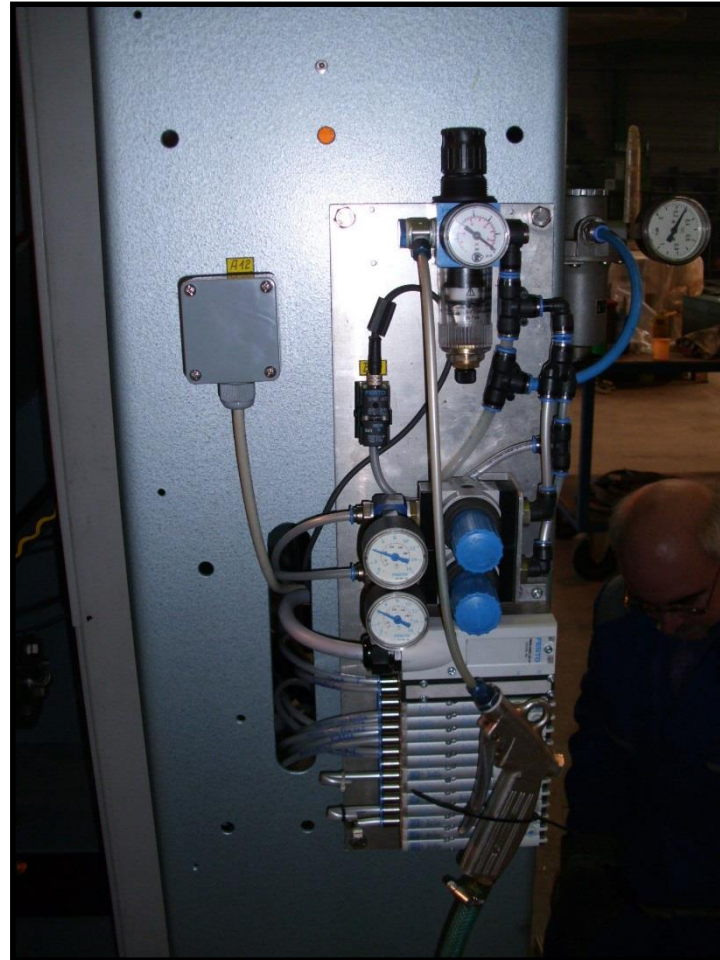

New valves and new drive

New pneumatic system

New shock absorbers

New switch cabinet

The above shown machine
had been completely overhauled
in our works in spring 2010
after 31 years of service.
